Steurer systems

dryingCabinet speedDry
type TS8 Premium Gen4

Drying cabinet 8 sets

Drying cabinet in the speedDry series, made of hot galvanised sheet metal, powder-coated, double-wing doors with magnetic fastener with interlock function. 16 alluminium dryer arms for shoes and gloves (oval aluminium) with unique Steurer speedDry blow-out end caps. 8 removable, unique blow-out clothes rail for hanging up jackets and trousers to simplify handling and drying operations. Powerful ebm-papst blower with approx. 385 m³ air displacement per hour, high-quality stainless steel heating coil to heat the air (overtemperature protection), with optimum ionisation unit to neutralise odours and remove pathogens from the air in an ozone-free manner. The new xControl control unit with colour display and industry-standard plastic foil keyboard provides the operator with a simple and intuitive as well as multi-lingual user interface for managing the timing and power consumption of the system. The timers have variable settings and a countdown time can also be enabled (countdown function). As an option, the xControl controller is also able to activate a definable drying cycle, which it does using an external input (EIB/house controller etc.).

PRODUCT INFO:

W / H / D	120 | 198 | 76 cm
Connected load	2150 W
Color	RAL 7016 anthracite grey
Shoes	8 pairs
Gloves	8 pairs
Jacket / pants	8 sets
Connection ratings	230 V AC | 50 Hz
Item No.	tr-spe-50068

simple operation via the new xControl control unit with colour display

new, extremely solid oval drying arms made of anodised aluminium for gloves with unique Steurer speedDry air end caps

new, extremely solid oval drying arms made of anodised aluminium for shoes with unique Steurer speedDry air end caps

dryingSystems speedDry
the technology

- The dryers in the speedDry series are available in various designs and offer lots of equipment options.

- They are divided into three product groups:
  - Drying cabinet speedDry (4/6/8)
  - Universal dryer speedDry (4/6/8)
  - Shoe dryer speedDry (10/15/20 pairs)

- We only use quality galvanised sheet metal: in combination with our own powder coating, we guarantee excellent protection from corrosion.

- The latest in ebm-papst fans combined with heated air guarantee an energy efficient drying environment that is easy on your equipment.

- As an additional highlight, the speedDry System can be equipped with ozone-free ionisation units which sterilise the air and neutralise odours.

- The new xControl control unit with colour display and industrial membrane keyboard offers the user a multi-lingual interface for simple and intuitive systems' time and energy management.

- The timers can be set as desired, and a countdown timer may be activated (egg timer function). The xControl controls also offer the option of activating a defined drying cycle via an external input (EIB/house controls, etc.).
